

## MASTER OF PUBLIC ADMINISTRATION: HEALTH ADMINISTRATION

**The Master of Public Administration: Health Administration is designed to prepare students with the skills to succeed in public service and health care management positions in a wide variety of organizations. This program integrates the core curriculum of Hilbert's Master of Public Administration program with a special focus on health administration and services.**

Whether you are a working professional or just beginning your career, the Master of Science in Public Administration: Health Administration program at Hilbert College will prepare you for the field with the knowledge of public service and the integration of health care practices. The accelerated degree program accommodates the needs of working professionals with convenient on-campus and online classes.

**16-Month Program**

**Enroll in Spring or Fall**

### **Reasons to pursue your graduate degree at Hilbert:**

- Innovative curriculum
- Multi-disciplinary faculty
- Practical experience and research opportunities
- Take one class at a time - courses are scheduled in five-week terms
- No GRE or GMAT required

**"I absolutely love the fact that I can focus on one class at a time instead of having four different assignments to work on simultaneously. I'm able to learn much more efficiently this way."**

*- Jonathan Sacli  
Masters Candidate 2020*

**The Hilbert College graduate degree in Public Administration: Health Administration** consists of 36 credit hours. Students take one course at a time and move with a cohort, developing colleagues and friends. Cohorts remain together throughout the 16-month program, changing a course of study every five weeks to complete 12 sessions. This model is convenient for individuals who are employed full-time.

Unique to Hilbert, the curriculum has been devised with an ongoing, integrated research project throughout the program. Unlike most graduate programs that ask for a final semester thesis, the Hilbert program allows for a more thorough application of theory and research as it is developed and worked on throughout the program. The graduate research project is designed to help students apply classroom concepts and theories to practical issues and problems. Students will use scientific research and develop information literacy to frame their topic of choice.

Within this program, students develop a research level necessary to set the foundation for clear data driven decision making. The program balances research in public policy with an additional focus on the health care field.
