

For the Fall 2011 semester Hilbert College has a new system that registers and controls access to the RESNET / wireless network. To use your device on campus, simply connect your machine to the RESNET network and follow the on-screen prompts.

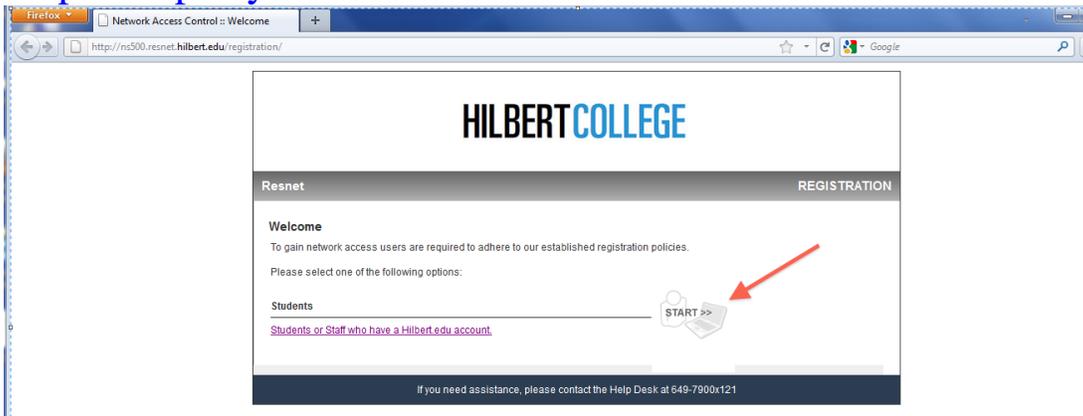

You will be required to logon to the Bradford Networks access controller with your Hilbert.edu account. After doing this, you will be prompted to download and install the Bradford agent, this program ensures your system is running up to date patches and operating system versions. After the scan is complete, you will be either passed through onto the internet, or placed in remediation, where you will be allowed to update your system before access is restored.

Accessing the Network via the Bradford system on Windows XP/Vista/7:

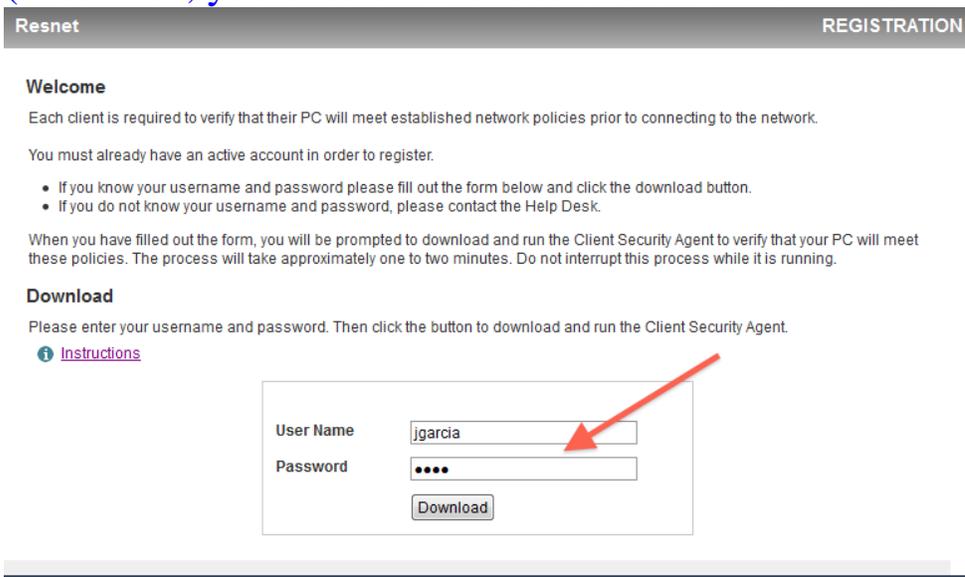

Step 1: Connect your computer to the RESNET Wireless network, or connect your Ethernet cable to the network jack in your dorm room

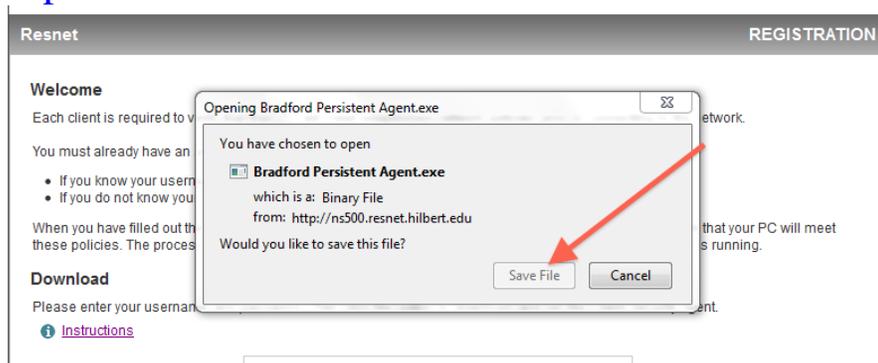

Step 2: Open your Web Browser and Click Start

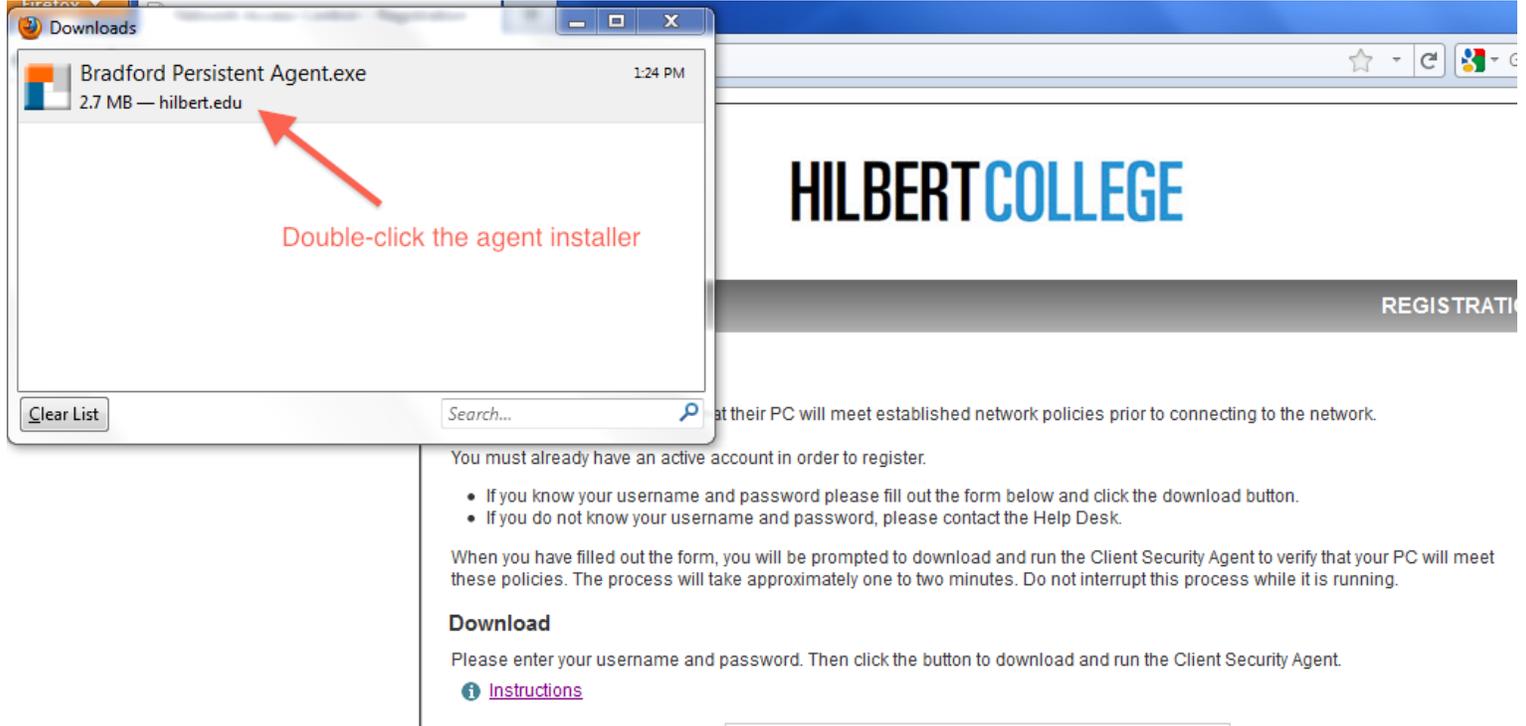

Step 3: Log in with your Hilbert.edu Username and Password and click Download (Freshmen, you should have received this information at the Fall convocation)

Step 4: Click Save File

Step 5:

The screenshot shows a web browser window displaying the Hilbert College registration page. The page header includes the Hilbert College logo and a "REGISTRATION" tab. The main content area contains instructions for registration, including a note that the user's PC must meet established network policies. A "Downloads" window is open in the foreground, showing a file named "Bradford Persistent Agent.exe" (2.7 MB) from "hilbert.edu". A red arrow points to the file name, and the text "Double-click the agent installer" is written below it.

HILBERT COLLEGE

REGISTRATION

at their PC will meet established network policies prior to connecting to the network.

You must already have an active account in order to register.

- If you know your username and password please fill out the form below and click the download button.
- If you do not know your username and password, please contact the Help Desk.

When you have filled out the form, you will be prompted to download and run the Client Security Agent to verify that your PC will meet these policies. The process will take approximately one to two minutes. Do not interrupt this process while it is running.

Download

Please enter your username and password. Then click the button to download and run the Client Security Agent.

Step 6:

The screenshot shows the Bradford Persistent Agent Setup Wizard. The window title is "Bradford Persistent Agent Setup". The main content area displays the Bradford Networks logo and the text "Welcome to the Bradford Persistent Agent Setup Wizard". Below this, it states: "The Setup Wizard will install Bradford Persistent Agent on your computer. Click Next to continue or Cancel to exit the Setup Wizard." A red arrow points to the "Next" button, and the text "Click Next" is written above it.
