

CREDIT HOUR POLICY & COMPLIANCE

All courses taken for credit at Hilbert College that apply toward completion of degree and certificate completion requirements conform to applicable state and federal regulations concerning the assignment of credit hours. The following provides information concerning credit hour assignment policies.

CREDIT HOUR DEFINITION

A. NEW YORK STATE:

All credit-bearing degree and certificate programs at Hilbert College are approved by the New York State Education Department (NYSED). Calculation of credit hours for these programs follows NYSED guidelines, which are consistent with the US Department of Education's definition of a credit hour.

Per Codes, Rules and Regulations of the State of New York, Title 8 – Education Department, Chap. II – Regulations of the commissioner, Subchapter A – Higher and Professional Regulations, Part 50- General: (pertinent excerpts)

Section 50.1 (o)¹ stipulates the following:

"Semester hour means a credit, point or other unit granted for the satisfactory completion of a course which requires at least 15 hours (of 50 minutes each) of instruction and at least 30 hours of supplementary assignments, except as otherwise provide pursuant to Section 52.2 (c)(4) of the subchapter. This basic measure shall be adjusted proportionately to translate the value of other academic calendars and formats of study in relation to the credit granted for study during the two semesters that comprise an academic year."

Section 52.2 (c)(4)² stipulates:

"A semester hour of credit may be granted by an institution for fewer hours of instruction and study than those specified in subdivision (o) of section 50.1 of this Subchapter only: (i) when approved by the commissioner as part of a registered curriculum; (ii) when the commissioner has granted prior approval for the institution to maintain a statement of academic standards that defines the considerations which establish equivalency of instruction and study and such statement has been adopted by the institution; or (iii) in the event of a temporary closure of an institution by the State or local government as a result of a disaster, as defined in section 50.1(w) of this Title, when the commissioner has granted approval for the institution to maintain a statement of academic standards that defines the considerations which establish equivalency of instruction and study and such statement has been adopted by the institution."

B. U.S. DEPARTMENT OF EDUCATION

Electronic Code of Federal Regulations, Title 34: Education, Part 600 – Institutional Eligibility under the Higher Education Act of 1965, as amended, Subpart A – General, Section 600.2³ stipulates the following:

"Credit hour: Except as provided in 34 CFR 668.8 (k) and (l), a credit hour is amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates not less than – (1) one hour of classroom or direct faculty instruction and minimum of two hours of out of class student work each week for approximately fifteen weeks for on semester or trimester hour of credit, or ten to twelve weeks for one quarter hours of credit or the equivalent amount of work over a different amount of time; or (2) At least an equivalent amount of work as required in paragraph (1) of this definition for other academic activities as established by the institution including laboratory work, internships, practica, studio work and other academic work leading to the award of credit hours."

² New York State Education Department, *Section 52.2: Standards for the registration of undergraduate and graduate curricula*, 8 N.Y.C.R.R. § 52.2 (Westlaw), <https://govt.westlaw.com/nycrr/Document/Ieca63dd8c2211dd97adcd755bda2840>

³ U.S. Department of Education, "§ 600.2 Definitions," in *34 C.F.R. Part 600 – Institutional Eligibility Under the Higher Education Act*, eCFR, https://www.ecfr.gov/current/title-34/subtitle-B/chapter-VI/part-600/subpart-A/section-600.2?utm_source=chatgpt.com

U.S. Department of Education guidance⁴ on Program integrity regulations related to the credit hour also stipulate:

“The credit-hour definition does not dictate particular amounts of classroom time versus out-of-class student work. Further note that the definition provides that a credit hour may be for an equivalent amount of work over a different amount of time. There is no requirement that a 3-semester hour course meet 3 hours per week during a semester or a 3-quarter-hour course meet 3 hours per week during a quarter. The requirement is that the institution determine that there is an amount of student work for a credit hour that reasonably approximates not less than one hour of class and two hours of out-of-class student work per week over a semester for a semester hour or a quarter for a quarter hour. For example, an institution with a semester-based calendar has a graduate seminar for which it awards 3 semester hours. The class meets only one hour per week over a 15-week semester with the students expected to perform a substantial amount of outside research that is the equivalent of 8 or more hours of student work each week of the semester. For purposes of the Federal definition, the institution would be able to award up to 3 semester hours for the course.”

C. MIDDLE STATES COMMISSION ON HIGHER EDUCATION

The Middle States Commission on Higher Education expects all candidate and accredited institutions to demonstrate that they use acceptable and consistent methods for assigning credit hours to all courses and programs of study. The credit hour is defined by the U.S. Department of Education as a basic institutional measure of the level of instruction and academic rigor that establishes eligibility for federal funding.⁵

CREDIT HOUR ASSIGNMENT POLICIES

All semester credit hours awarded by Hilbert will conform to the definitions listed above. Therefore, all units of credit awarded will conform to the federal and state definitions.

Hilbert College operates on a semester system, with fall and spring semesters consisting of a minimum of fifteen weeks of instruction. The College does not designate a separate exam week; final assessments are incorporated into the regular semester schedule. Hilbert College Global (HCG) follows an accelerated format, offering two seven-and-a-half-week sessions within each fifteen-week semester. Graduate programs may follow either the full-term or accelerated session schedule, depending on the course being offered. All courses, regardless of delivery mode or length, adhere to institutional and state policies governing credit hours and the total amount of instructional and student work required.

The faculty and division chairs are responsible for developing, maintaining and evaluating the curriculum within an academic program. Initial assignment of credit hours for courses is based on faculty expertise and course learning objectives. Existing courses are examined for adherence to the US Department of Education and NYSED credit hour regulations. New courses are submitted to the Curriculum Committee for discussion and review. Upon approval, the Committee recommends the course to the full Faculty Senate for final approval.

The Curriculum Committee is charged with applying the following credit hour guidelines in its review and approval of all courses and curricula, and with certifying that the expected student learning for each course meets the established credit hour standard. A designated official from the Office of Registration and Records serves as an ex officio member of the Committee to ensure compliance with these standards and related academic policies.

Approved courses are shared with the Office of Registration and Records for inclusion in the Hilbert College catalog and appropriate semester schedules. The Office of Registration and Records reviews the class schedule prior to the start of each semester to ensure that all classes are scheduled for the minimum number of minutes corresponding to the credits assigned. Any discrepancies are brought to the attention of the appropriate division for correction or explanation.

The following information provides general guidance on how the credit hour translates to the specific instructional method. Note, however, that the credit hour definition does not dictate particular amount of classroom time versus out of class student work. The information below serves as general guidance only.

LECTURE AND SEMINAR: Course with multiple students which meet to engage in various forms of group instruction under the direct supervision of a faculty member.

LECTURES AND SEMINARS: CLASSROOM/FACULTY INSTRUCTION AND OUTSIDE STUDENT WORK					
Credits Awarded	Minimum Contact per Week	Minimum Instructional Time (Contact time x 15 Weeks)	Minimum Out of Class Student Work per Week	Minimum Out of Class Student Work (Outside Work X 15 Weeks)	Total of instructional contact time & out of class student work
1	50 contact minutes	750 contact minutes	100 minutes	1500 minutes	2250 minutes (37.5 hours)
2	100	1500	200	3000	4500 (75.0 hours)
3	150	2250	300	4500	6750 (112.5 hours)
4	200	3000	400	6000	9000 (150 hours)
5	250	3750	500	7500	11250 (225 hours)

LABORATORY: Courses with a focus on experiential learning under the direct supervision of a faculty member wherein the student performs substantive work in a laboratory setting. The minimum contact time per credit is typically twice that of a lecture (2:1 ratio). There are some cases where Lecture and Lab courses are tied together in a 4 + 0 credit hour set. The actual breakdown for classroom time and outside work is lecture is 3 credits and the laboratory is 1 credit of class time.

LABORATORY: CLASSROOM/FACULTY INSTRUCTION AND OUTSIDE STUDENT WORK					
Credits Awarded	Minimum Contact per Week	Minimum Instructional Time (Contact time x 15 Weeks)	Minimum Out of Class Student Work per Week	Minimum Out of Class Student Work (Outside Work X 15 Weeks)	Total of instructional contact time & out of class student work
1	100 contact minutes	1500 contact minutes	50 minutes	750 minutes	2250 minutes (37.5 hours)
2	200	3000	100	1500	4500 (75.0 hours)
3	300	4500	150	2250	6750 (112.5 hours)
4	400	6000	200	3000	9000 (150 hours)
5	500	7500	250	3750	11250 (225 hours)

DIRECTED/INDEPENDENT STUDY: Courses of study in which a faculty member regularly interacts and directs student outcomes with periodic contact. These courses can also be created in instances where enrollment has fallen below established standards but under conditions where a student or students require that course be offered in order to progress academically (such as the need for a particular course in order to graduate). In either case the minimum credit hours are determined based on faculty instructional contact minutes and student outside work time. In all such instances, such courses must match the total amount of work using the examples listed above.

INTERNSHIP/PRACTICA/FIELD EXPERIENCE/SERVICE LEARNING: Courses of study in which a faculty member regularly interacts and directs student outcomes with periodic contact, but where the actual learning environment takes place off-campus at an approved site. The learning experience will typically involve a site supervisor or preceptor and directed activity/learning will occur outside of a lecture setting. Contact time and outside student work requirements must be established and documented and must match the total amount of work using the example above.

Online Courses: Courses offered entirely online without any on-site face-to-face meetings. These courses have the same learning outcomes and substantive components of a standard lecture/seminar course with an alternative delivery method. Contact time is satisfied by several means which can include but is not limited to, the following: a.) regular instruction or interaction with a faculty member once a week for each week the course runs. b.) Academic engagement through interactive tutorials, group discussions moderated by faculty, virtual study/project groups, engaging with class peers and computer tutorials graded and reviewed by faculty. In all such instances, these courses must meet the total amount of instructional and student work time as the examples above even if delivered online or asynchronously.

- Instructional time can be estimated using the faculty's educated calculation of how much time would be sufficient to achieve satisfactory progress toward learning outcomes on the following activities:
- Reading, viewing or listening to course presentations
- Reading other course materials
- Participation in course interactions (discussions via text, audio, or video)
- Conducting research as part of the class
- Completing class assignments, projects or other assessment activities

This can be accomplished by a faculty member breaking down course activities ahead of the start of the course and providing details regarding specific items and estimated completion time. Throughout the course students can be surveyed to assure the estimates are accurate or corrections can be made for the remainder of the course as well as the next time it's offered.

HYBRID COURSES: Courses offered in a blended format with one (1) or more on site face-to-face class sessions, with the remainder of the course interactions occurring through synchronous or asynchronous online interactions. Contact time is assessed using both on-site definitions (for the on-site portion) and online definitions as above (for the online portion). In all such instances, these courses must meet total amount of instructional and student work time as the examples above even if delivered online or asynchronously.
